

ALFALFA

RGT ETINCELLE

A protein explosion

- Explosive establishment and spring growth
- High yield and protein content
- Excellent persistency
- Very good verticillium resistance

ALFALFA

RGT ETINCELLE

VARIETY PROFILE

Registration

2014 (FR)

Dormancy

4,4 - Northern type

Persistence

4 years

Use

- Cutting: silage, hay
- Grazing possible

A protein explosion

EXPLOSIVE ESTABLISHMENT AND SPRING START

ETINCELLE offers very **good establishment** which is essential for the alfalfa to be developed enough before the coldness of the winter or before the summer drought. In addition, **ETINCELLE** show very good spring growth, helping to secure an early and substantial harvest.

HIGH YIELD AND QUALITY

ETINCELLE offers high yields - it is in the top 5 best yielding varieties in the French catalogue. Thanks to **excellent persistency**, yields are maintained over the years.

In addition, **ETINCELLE** has very good disease tolerance, especially to **Verticillium**, maintaining forage quality in high disease pressure situations. A high level of protein provides good quality forage, making it **ideal for farmers who want to optimise their production cost by producing more protein** on their own farm.

TRIAL RESULTS

	ETINCELLE*	Behaviour compared to control varieties
Yield (Y1 + Y2, T DM/ha)	28,9	++++
Protein content (% DM)	24,4	+++
Persistency	6,9	++++
Tolerance to verticillium**	7,4	++++
Establishment	6,5	++++
Spring start	6,2	++++
